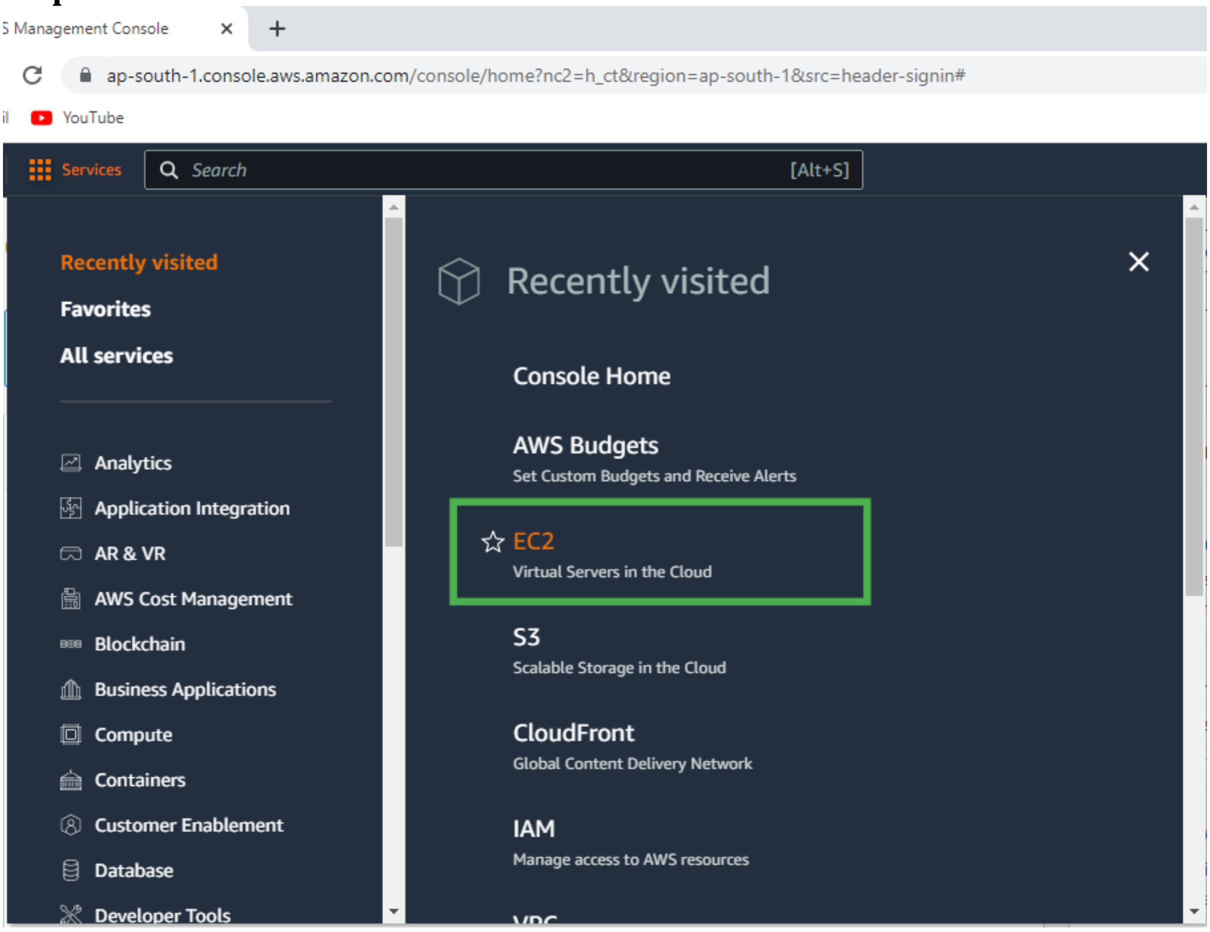
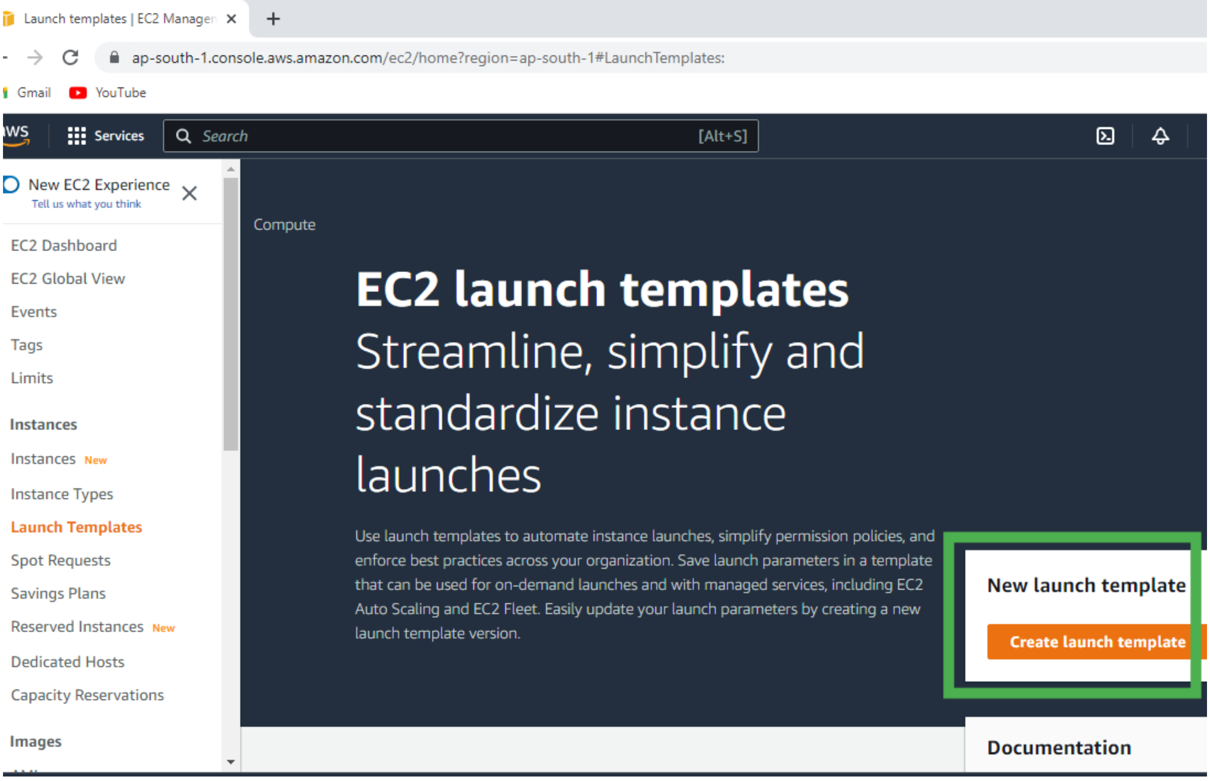
Steps to Setup the Auto Scaling Group in EC2

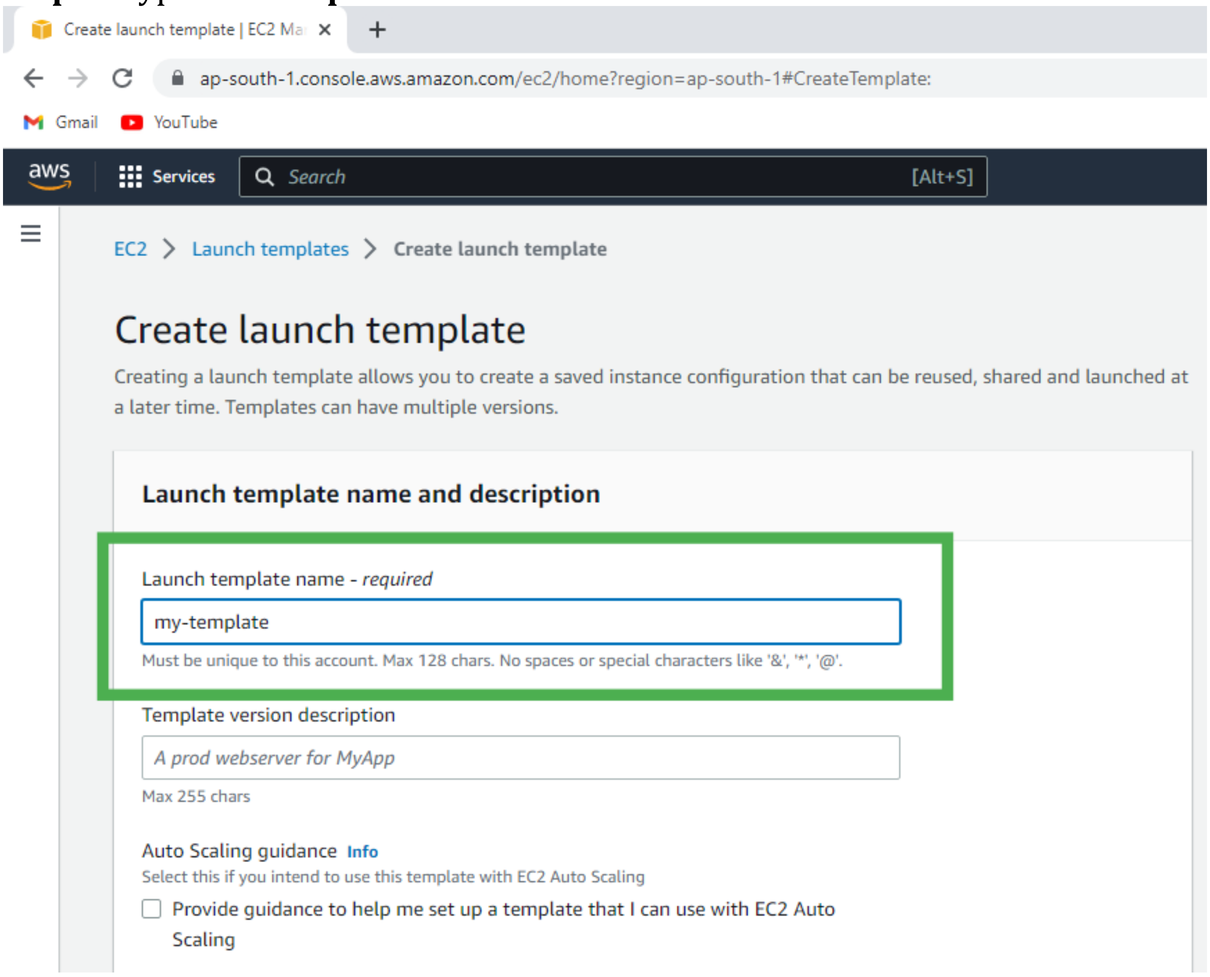
Step 1: Click on the **All Services.**
Step 2: Click on the **EC2.**



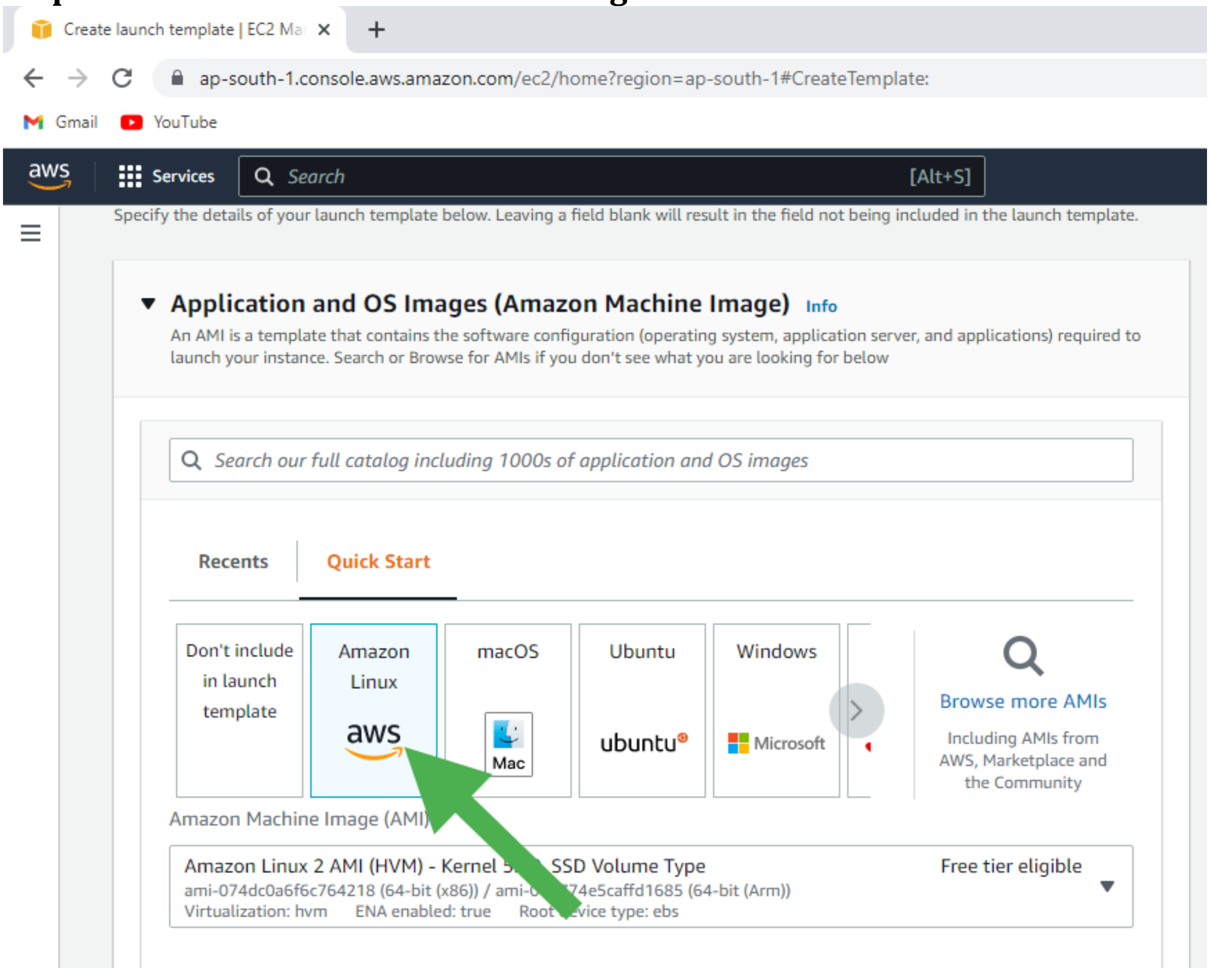
Step 3: Scroll Down and click on the **Launch Templates** and click on the **Create launch template**



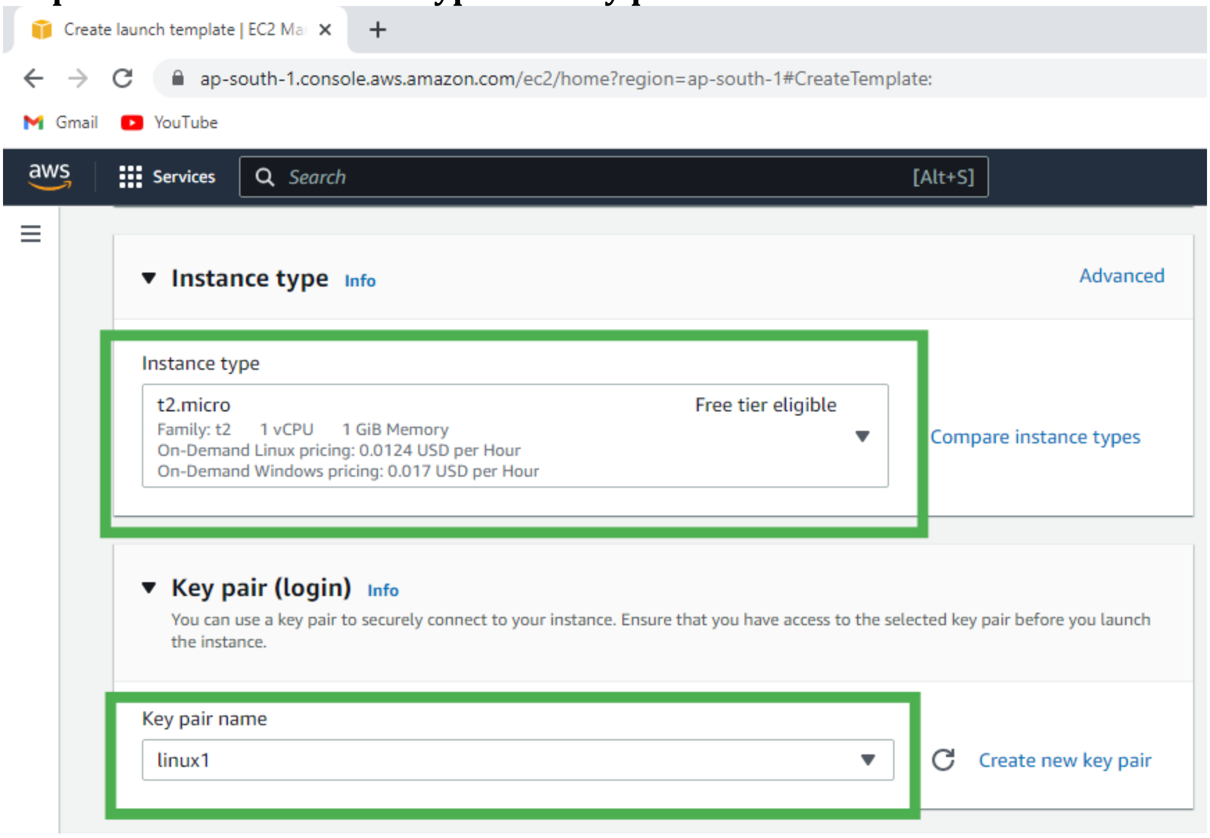
Step 4: Type the **Template name.**



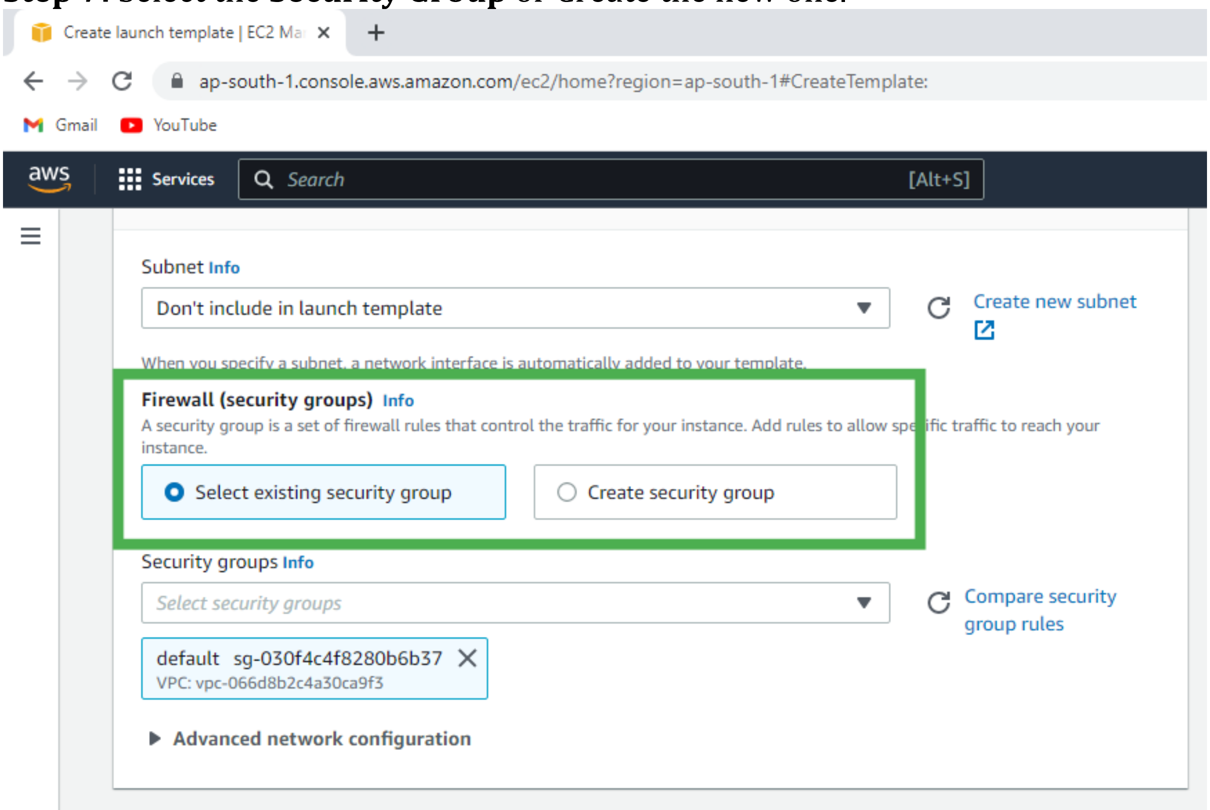
Step 5: Select the **Amazon Machine Image.**



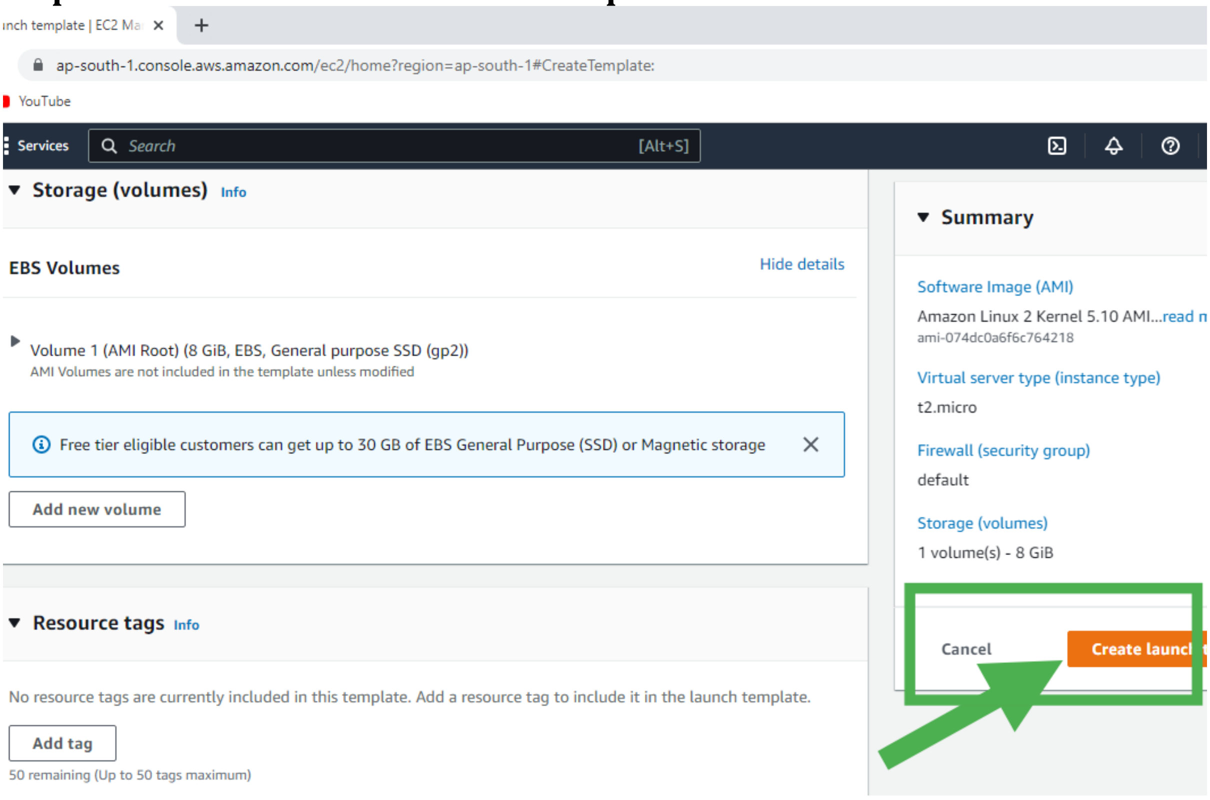
Step 6: Select the **Instance Type** and **Key pair.**



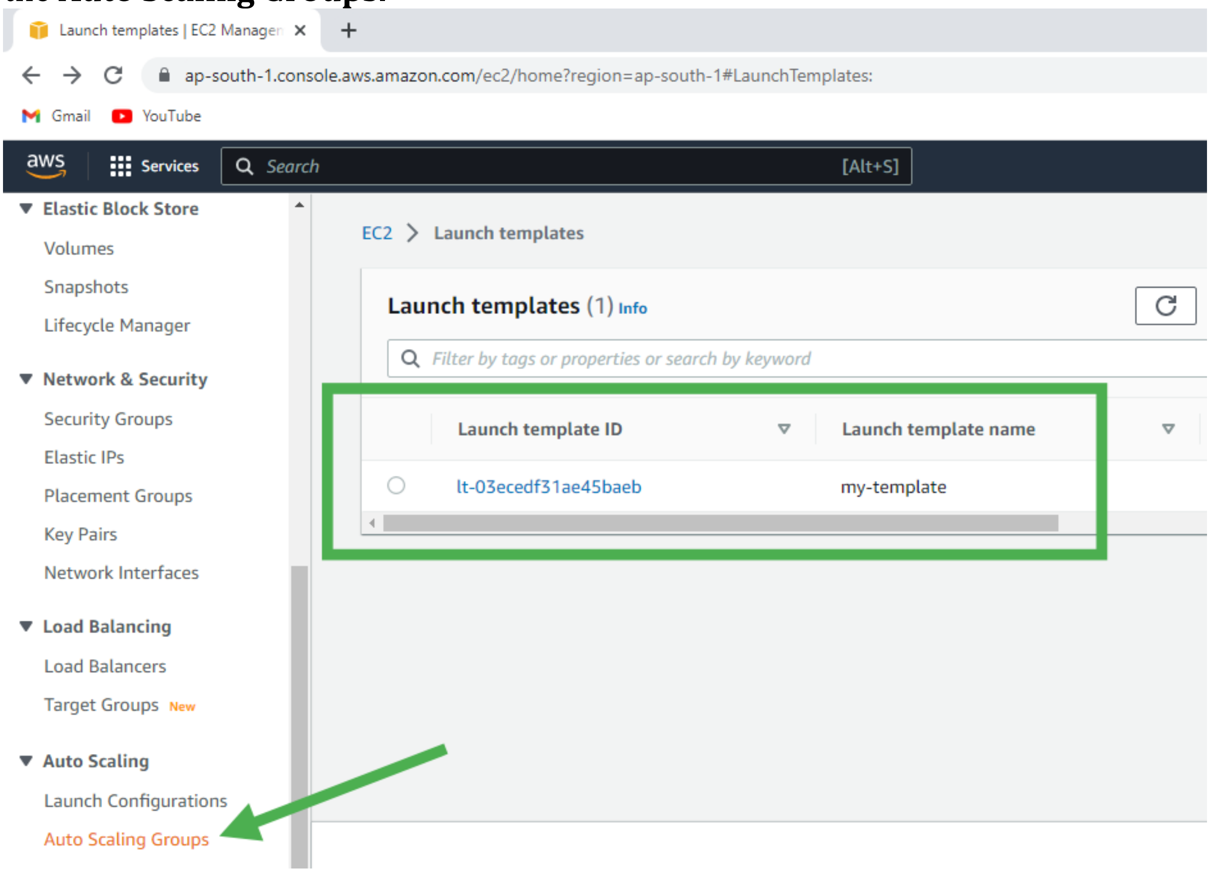
Step 7: Select the **Security Group** or Create the new one.



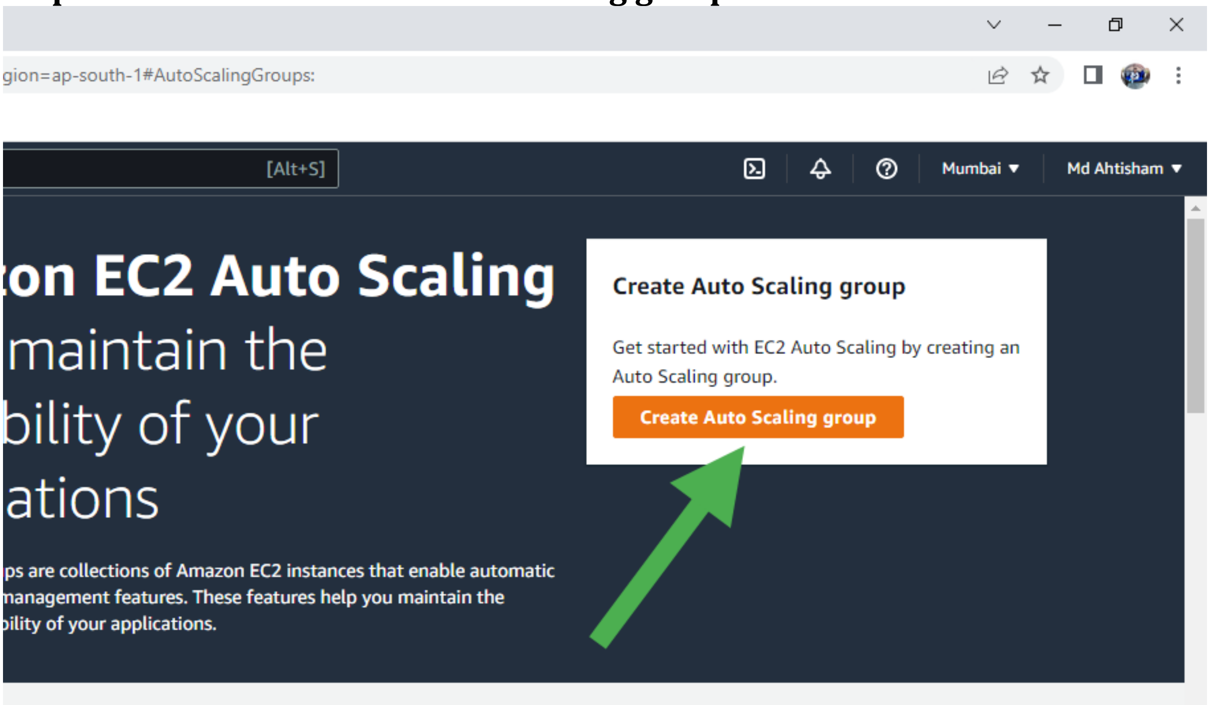
Step 8: Click on the **Create Launch Template.**



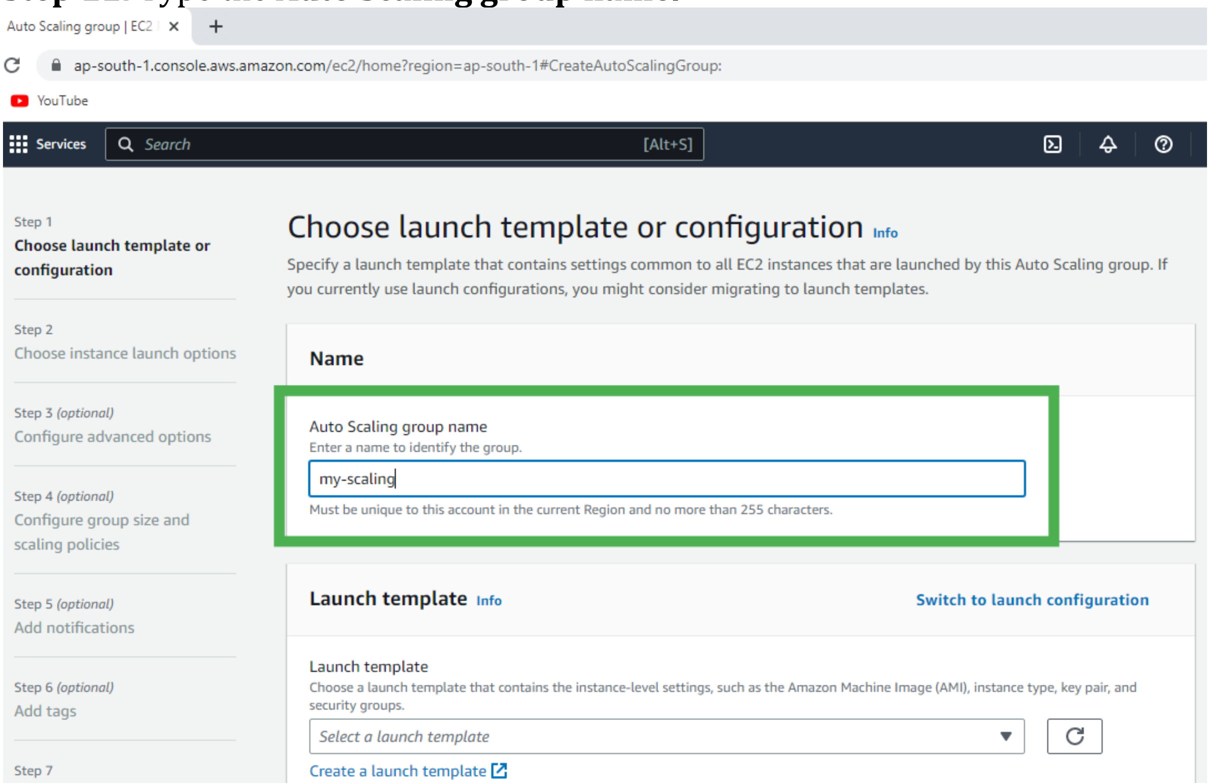
Step 9: Now you can see the template is **created.** Now, scroll down and click on the **Auto Scaling Groups.**



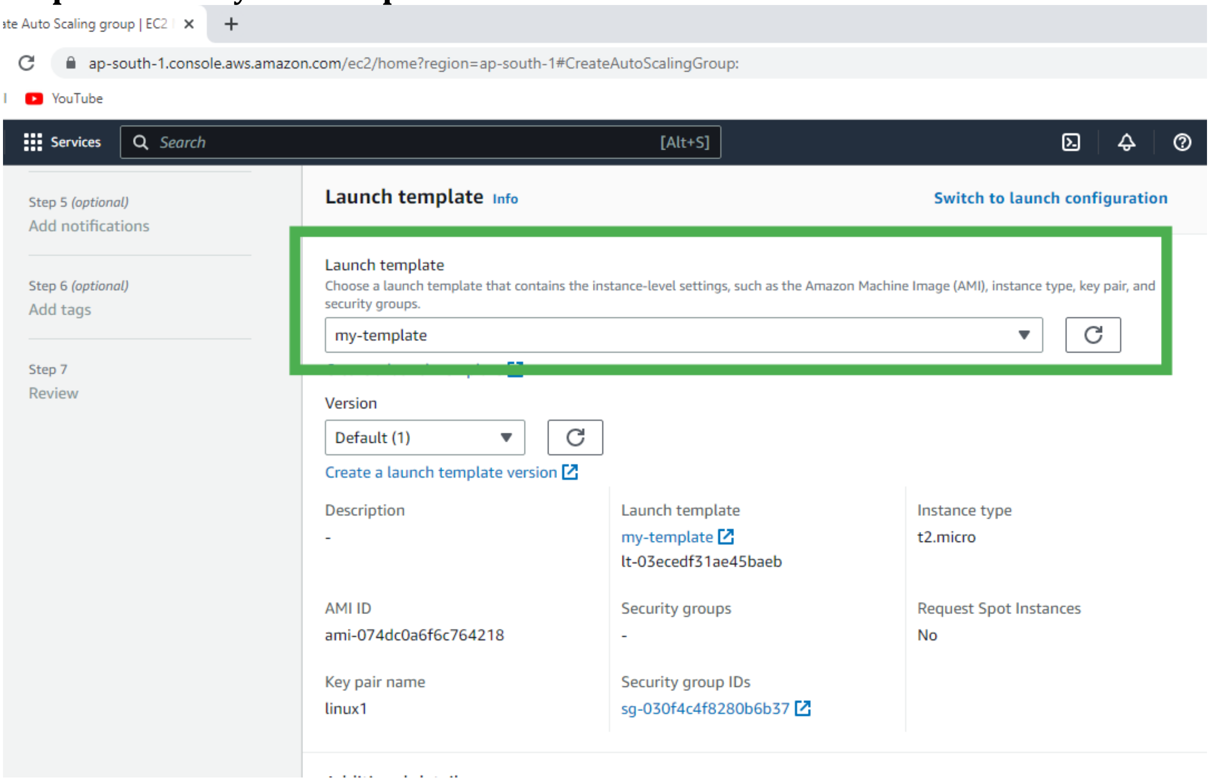
Step 10: Click on the **Create Auto Scaling group.**



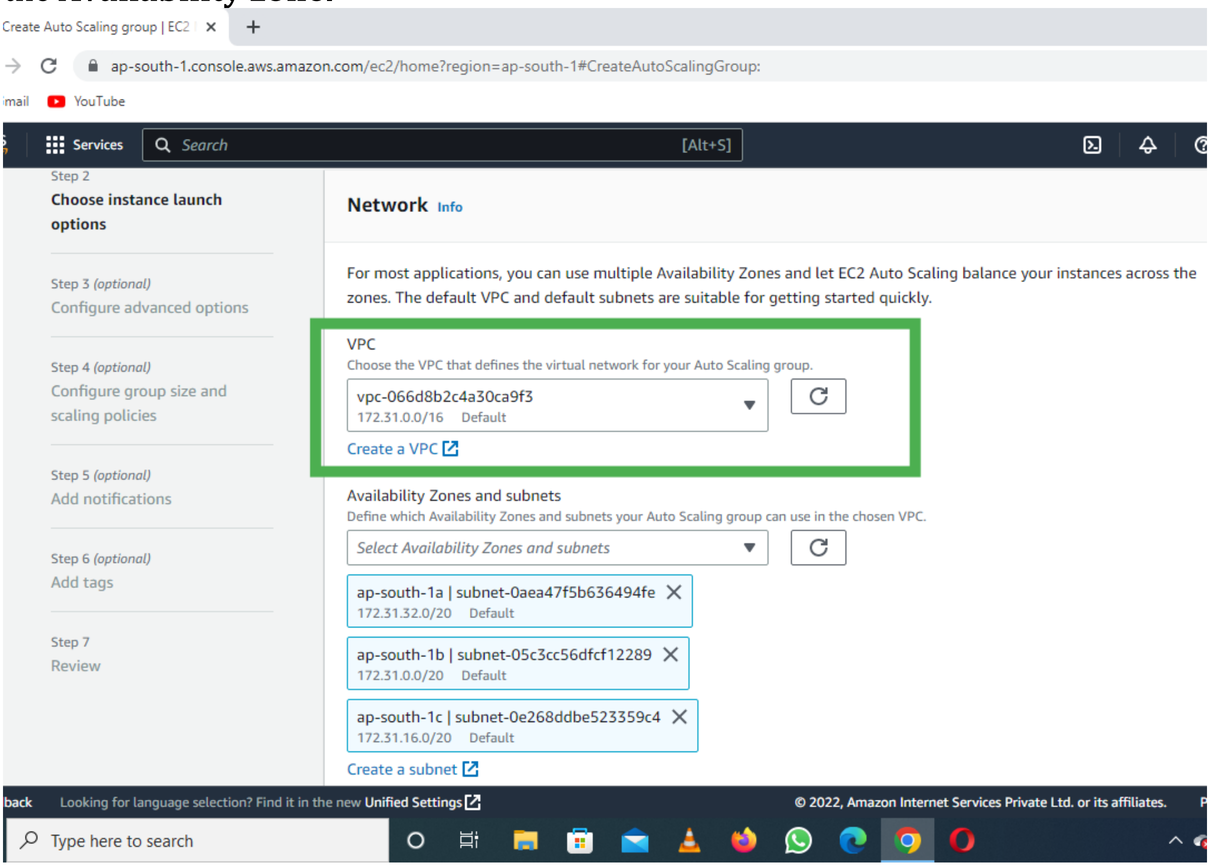
Step 11: Type the **Auto Scaling group name.**



Step 12: Select your **Template.**

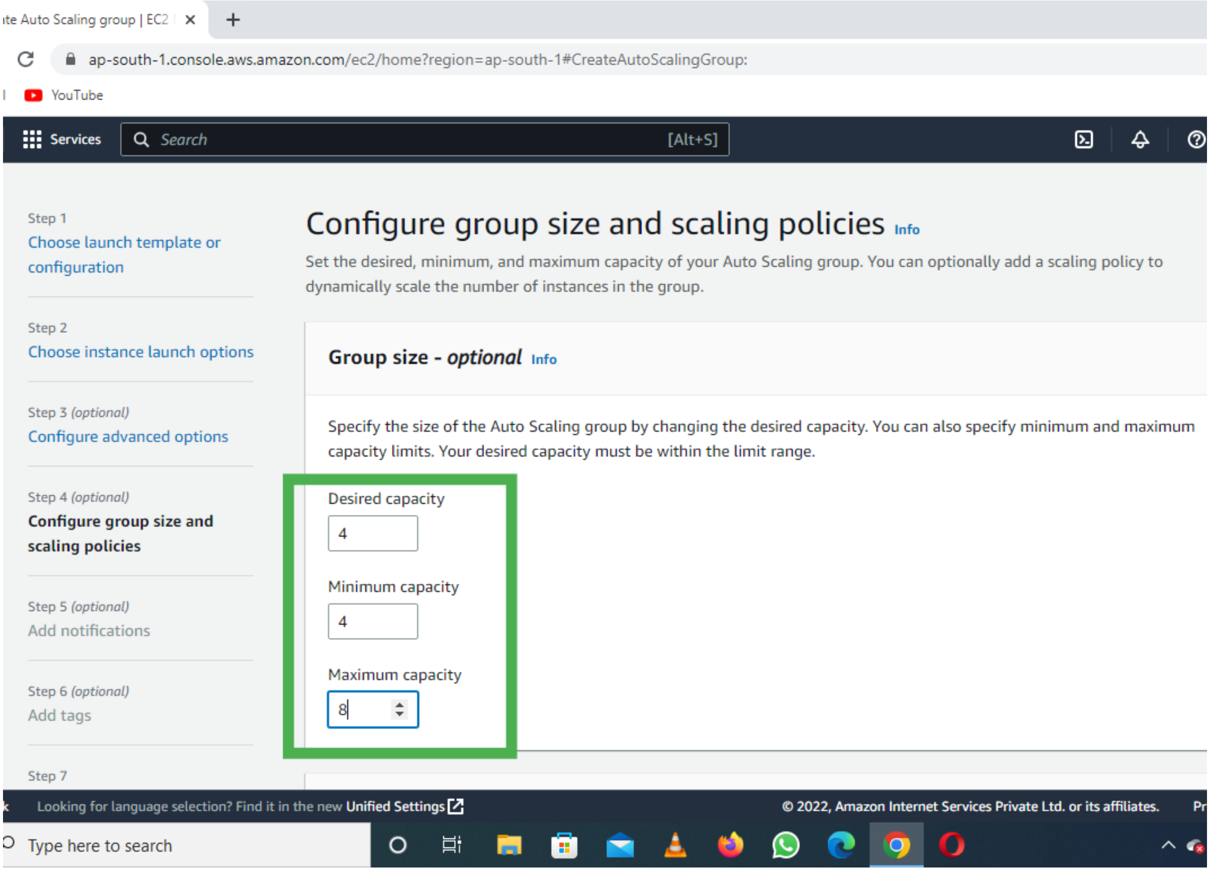


Step 13: Select the **VPC** or go with the default VPC and also select the **Availability zone.**

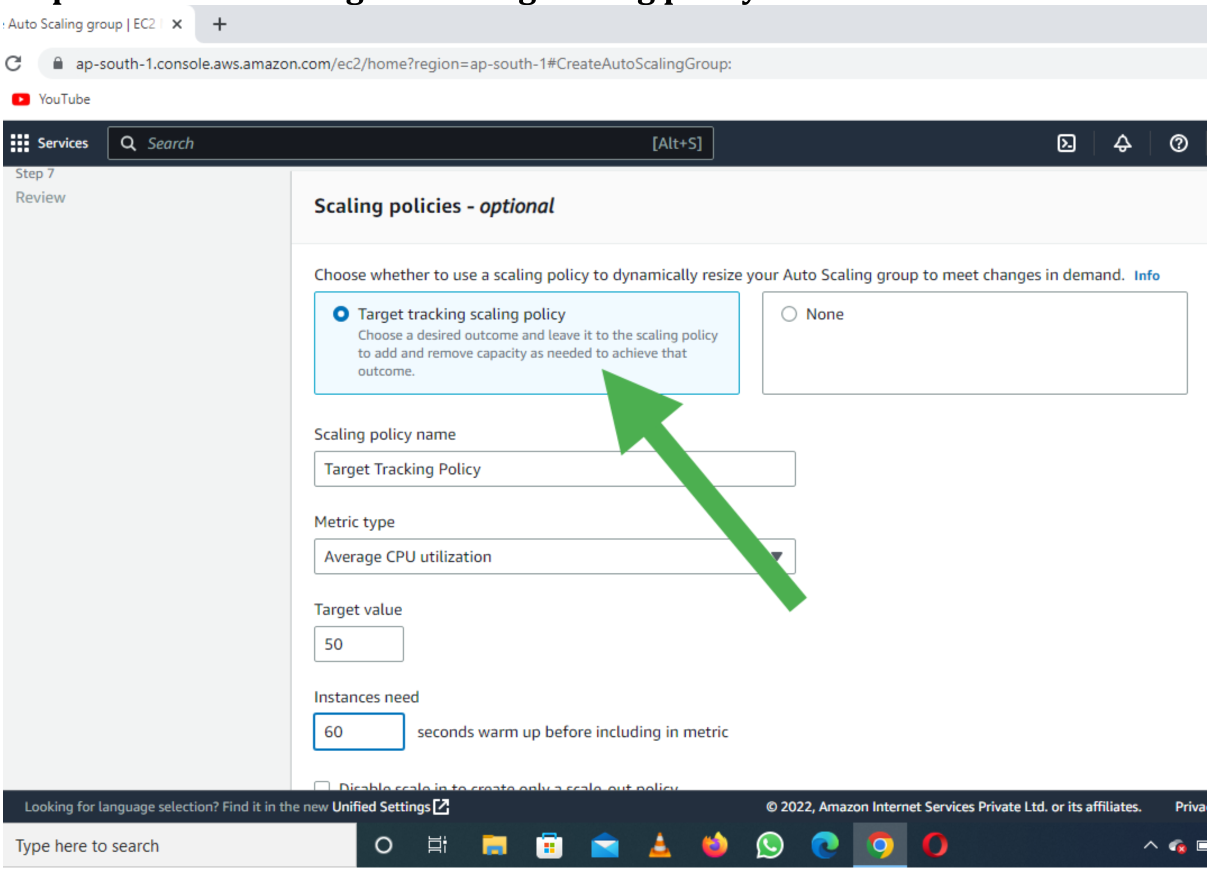


Step 14: Configure the **Group size** and **Scaling policies.**
Select as per your requirement:

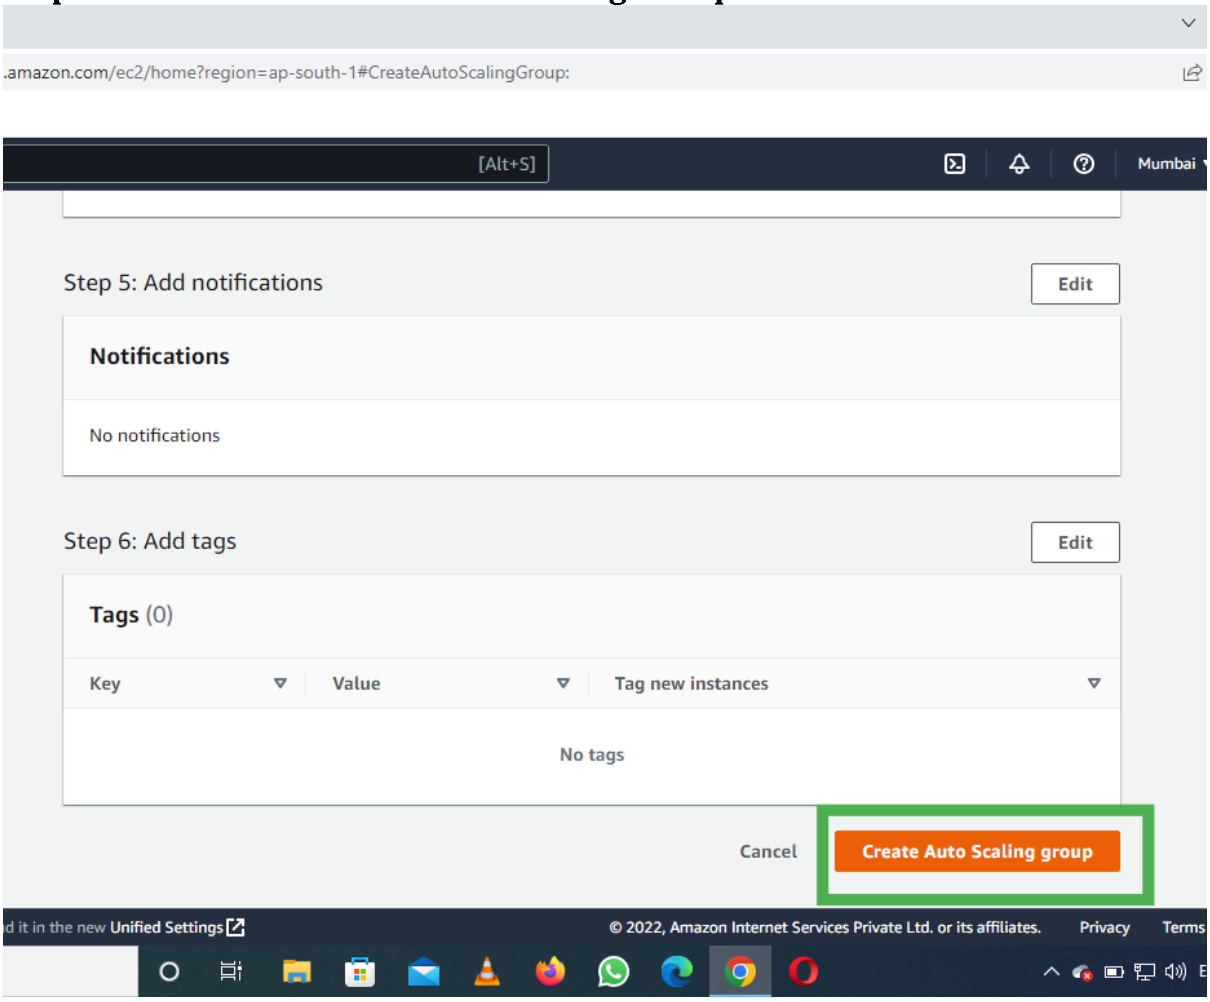
- Desired: 4
- Minimum: 4
- Maximum: 8



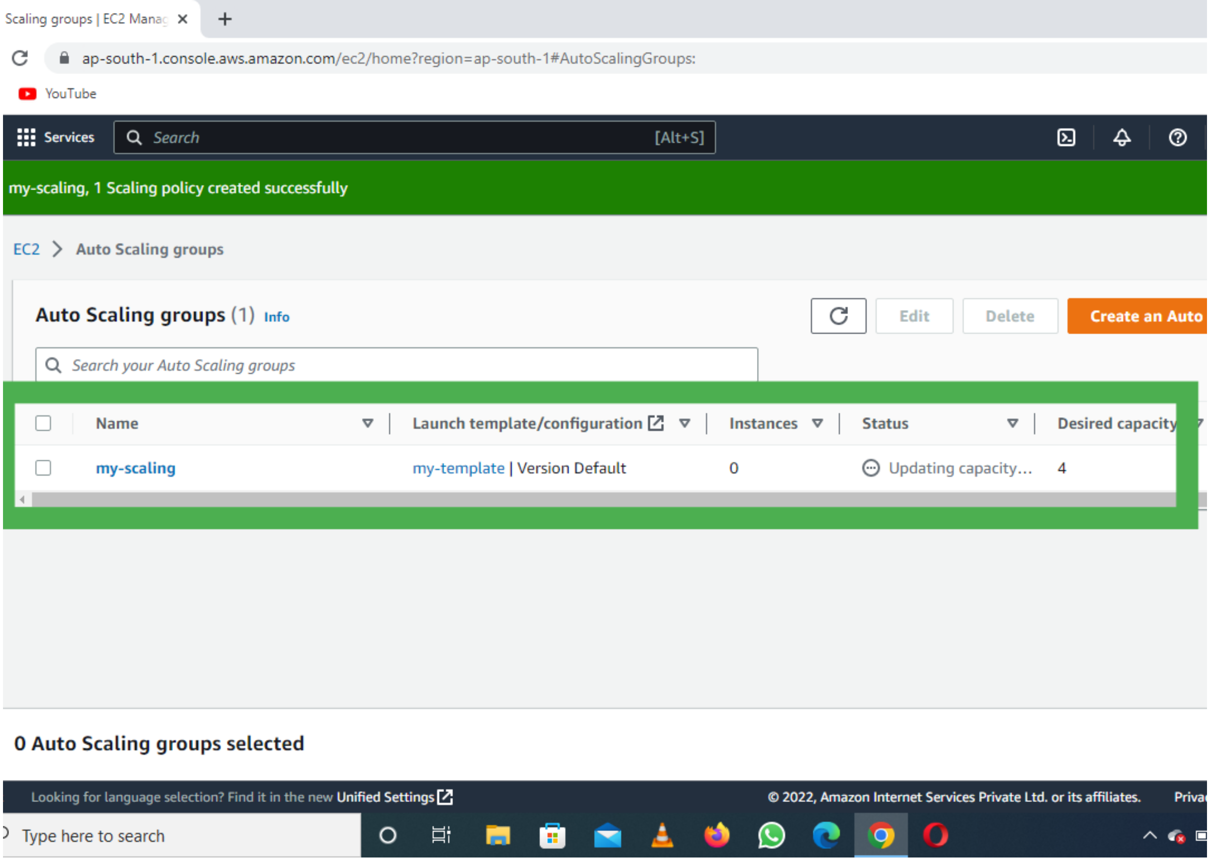
Step 15: Select the **Target tracking scaling policy.**



Step 16: Click on the **Create Auto Scaling Group.**



- Now you can see the **Auto Scaling is creating** and it is also creating the desired state of the EC2 Instance



- We selected the **Desired state equal to 4** and you can see the **4 Instance is Running**
