

Creating an Amazon EBS Snapshot

Follow these steps to manually capture and verify point-in-time snapshots of an EBS volume within the AWS Management Console:

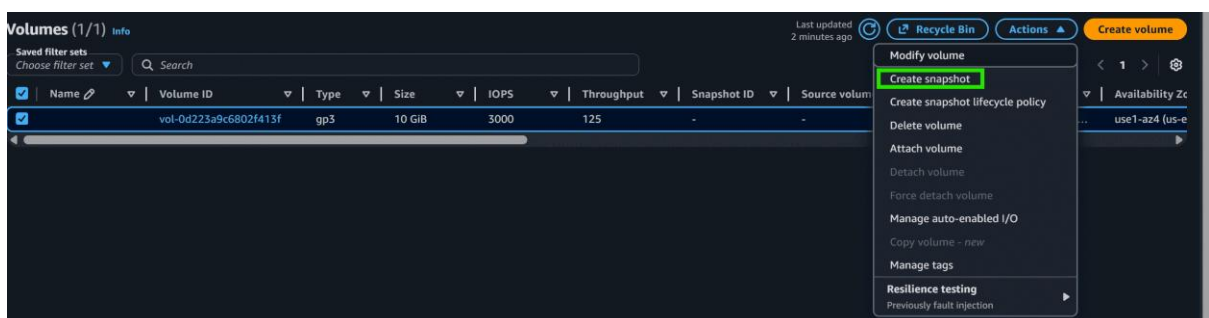

Step 1:

- Go to the EC2 Dashboard and select Volumes under the Elastic Block Store section.
- Select the EBS volume for which you want to create a snapshot.

Step 2:

- Click on the Actions button and select Create Snapshot.

Step 3:

- Enter a snapshot name or description. You can also add tags if required.
- Then click on Create Snapshot.

EC2 > Volumes > vol-0d223a9c6802f413f > Create snapshot

Create snapshot info

Create a point-in-time snapshot to back up the data on an Amazon EBS volume to Amazon S3.

Source volume

Volume ID
vol-0d223a9c6802f413f

Availability Zone
us-east-1a (us-east-1c)

Snapshot details

Description
Add a description for your snapshot.
GFG
255 characters maximum.

Encryption info
Not encrypted

Tags info
A tag is a label that you assign to an AWS resource. Each tag consists of a key and an optional value. You can use tags to search and filter your resources or track your AWS costs.
No tags associated with the resource.
[Add new tag](#)
You can add up to 50 tags.

[Cancel](#) [Create snapshot](#)

Step 4:

- Go to the Snapshots section under Elastic Block Store to check the snapshot status.
- The status changes from Pending to Completed once the snapshot is ready.
