

Steps to set up AWS CloudTrail

Step 1: Login to AWS Console

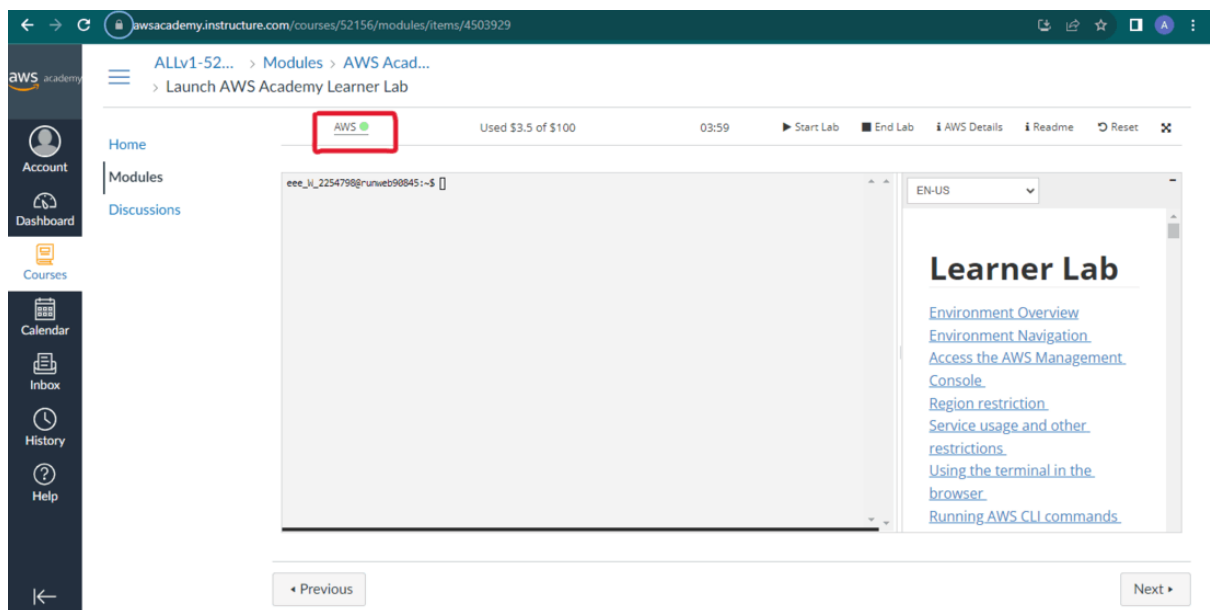

- Visit AWS Academy and login to your account.

Step 2: Access AWS Academy Learner Lab

- Navigate to AWS Academy Learner Lab [52156] -> Modules.

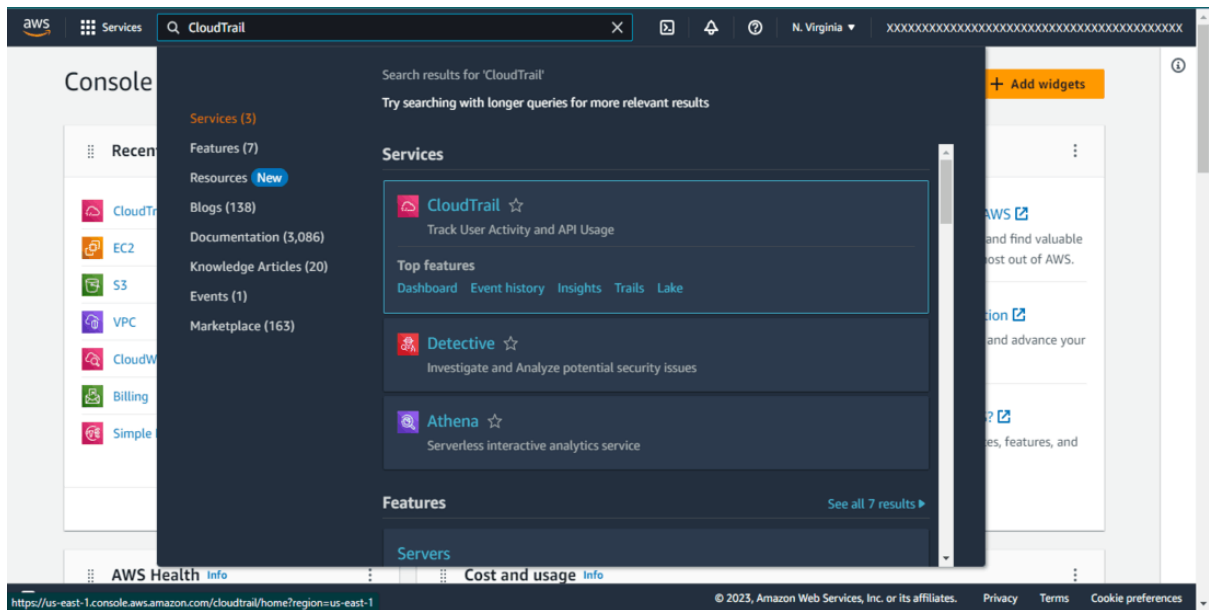

Step 3: Launch AWS Academy Learner Lab

- Start the lab session and proceed to AWSgreen dot.
- Then click on AWSgreen dot.

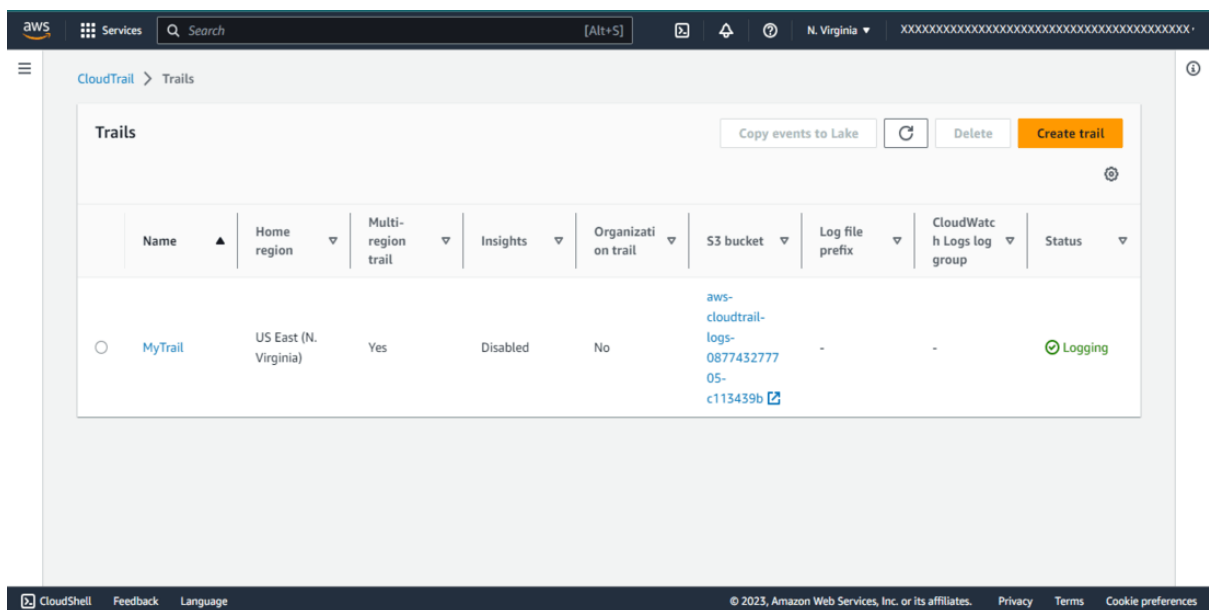

Step 4: Open CloudTrail Service

- Click on Services and search for "CloudTrail".

Step 5: Create CloudTrail

- Select "Create CloudTrail", name it as "MyTrail".

Step 6: Edit Storage Location

- Click on the created "MyTrail" and edit the storage location. Choose "Create new S3 bucket" and save changes.

General details
A trail created in the console is a multi-region trail. [Learn more](#)

Trail name
Enter a display name for your trail.
MyTrail
3-128 characters. Only letters, numbers, periods, underscores, and dashes are allowed.

☒ Enable for all accounts in my organization
To review accounts in your organization, open [AWS Organizations](#). [See all accounts](#)

Storage location [Info](#)

☒ Create new S3 bucket
Create a bucket to store logs for the trail.

☐ Use existing S3 bucket
Choose an existing bucket to store logs for this trail.

Trail log bucket and folder
Enter a new S3 bucket name and folder (prefix) to store your logs. Bucket names must be globally unique.
aws-cloudtrail-logs-087743277705-88641d1b
Logs will be stored in aws-cloudtrail-logs-087743277705-88641d1b/AWSLogs/087743277705

Log file SSE-KMS encryption [Info](#)
☐ Enabled

Additional settings

Log file validation [Info](#)
☐ Enabled

SNS notification delivery [Info](#)
☐ Enabled

[Cancel](#) [Save changes](#)

Step 7: Save Changes

- Confirm and save changes to finalize the S3 bucket configuration.

[CloudTrail](#) > [Trails](#) > [arn:aws:cloudtrail:us-east-1:087743277705:trail/MyTrail](#)

Trail logging Logging	Trail log location aws-cloudtrail-logs-087743277705-88641d1b/AWSLogs/087743277705	Log file validation Disabled	SNS notification delivery Disabled
Trail name MyTrail	Last log file delivered September 13, 2023, 23:30:30 (UTC+05:30)	Last file validation delivered -	Last SNS notification -
Multi-region trail Yes	Log file SSE-KMS encryption Not enabled		
Apply trail to my organization Not enabled			

CloudWatch Logs [Edit](#)

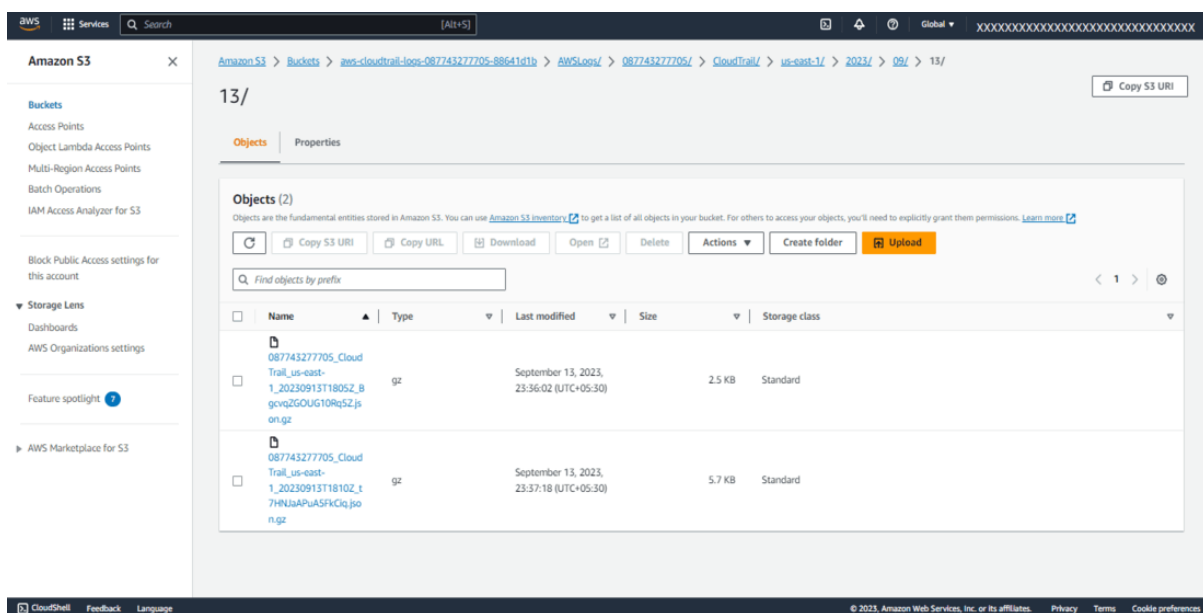

Step 8: Confirm Settings

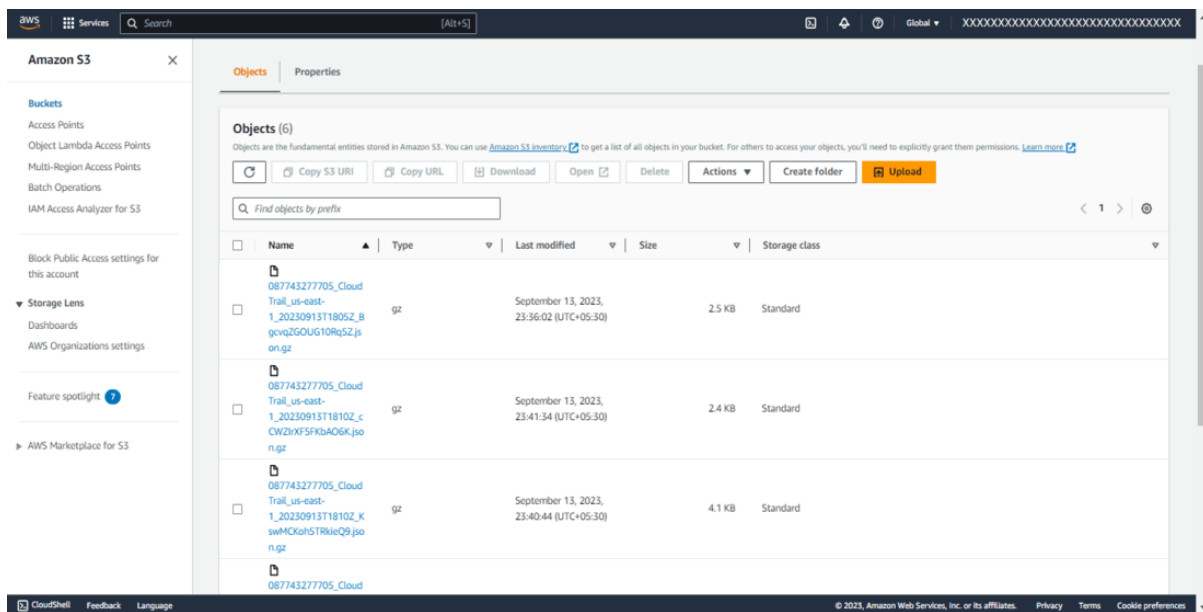

- Ensure data events are configured to deliver to the AWS CloudTrail console, Amazon S3 buckets, and optionally Amazon CloudWatch Logs.

Step 9: Monitor Data Events

- Data events are automatically stored in the designated S3 bucket.

Step 10: Access and Review Event Data

- Navigate to the S3 bucket, locate the first file, download it, and review the JSON formatted data events.
